SSL ASJ79 TechLite®

Description
The TechLite® insulation system is an innovative, patented, non-fibrous, lightweight foam that is factory jacketed with a laminated kraft paper and foil all service jacket (ASJ) covering. It has a wide service temperature range, low smoke and flame spread characteristics and is manufactured in 4' tube lengths and in sheets.

Applications
TechLite® SSL ASJ79 insulation is perfect for a variety of applications including applications where economical jacketing is required. This product features a self-sealing adhesive strip along the longitudinal seam for installation.

Table 1: Foam Technical Data

Property	Test Method	Value
Flexible open-cell melamine	ASTM C-1410	
Service temperature	ASTM C-1410	-40°F to 350°F
In service temp min-max limits		-150°F to 400°F
Density [lb/ft^3]	ASTM D-3574	0.56 ±0.06
Thermal Conductivity, k [Btu·in/h·ft^2·°F]	ASTM C-177	0.19 at -40°F mean
		0.25 at 75°F mean
		0.45 at 300°F mean
Indentation force deflection, min [lb 50 in^2]	ASTM D-3574	
Compression at 25%		80
Compression at 65%		160
Tensile Strength min [lb/in^2]	ASTM D-3574	14
Percent Elongation, max	ASTM D-3574	30
Surface burning characteristics, max		
Flame spread index smoke development at 1in thick	ASTM E-84	25/50
Oxygen Index, minimum % oxygen	ASTM D-2863	33
National Fire Protection Association No. 101		Class A
Uniform Building Code 1988 Part VII sec 4201-4203		Class 1
ASTM C-871		Passes
ASTM C-795		Passes
NRC Guide 1.36, Section C, Para 2 (b)		Passes
Boeing Specification, BSS 7239		Meets and Exceeds
Airbus Industries Specification	ATS-1000.001	Meets and Exceeds

Jacket Technical Data
ASJ jacketing is made of a kraft paper/foil laminate with fiberglass reinforcing fibers. The nominal thickness is 0.009 inches. It is suitable for dry industrial, commercial, and institutional areas.

Table 2: Jacket Technical Data

Property	Test Method	Value
Aluminum foil		0.00035 inch
Kraft paper		45 lb/3000 ft^2
Ambient temperature range		-41°F to 240°F
Total weight [oz/yd^2]		30 lb/100 ft^2
Tensile Strength	ASTM D828 Modified	MD 50lb/in CD 40 lb/in
Permeance	ASTM E-96 A	0.02 perms
Mullen Burst Strength	ASTM D-744 P5.1 Avg.	55 psi
Fire hazard classification	ASTM E-84 / UL723	15/20 paper, 0/0 foil

Fittings
Rigid PVC fittings covers are supplied with pre-formed TechLite® inserts or diapers. Sheet Stock Material is available in sheet form for tanks and duct work in sizes up to 48" x 96" in thickness from ½" to 3" in ½ inch increments. Other thicknesses are available upon request.

Accessories
ASJ tape is required to solvent weld all seams.
Factory approved silicone sealant is required to seal any large gaps and to insulate jacket edges from hot surfaces.

Storage
Cartons are not intended for outdoor storage. Protect from rain and other abuse.

Preparation
Apply only to clean, dry surfaces.

General Application
All exposed pipe surfaces must be covered with sufficient insulation. No gaps or thin areas on fittings should be allowed. Seal all seams and covers with ASJ tape and/or factory approved silicone sealant. Any exposed insulation must be covered with ASJ tape or PVC such as end caps or flange covers. Cold systems must have a continuous vapor barrier maintained. Vapor retarder mastic (CP-70 or equal) should be applied every 12ft to butt ends of insulation. Hot systems must be sized to keep the jacket temperature below 140°F for personnel protection.

Insulation for pipes, tanks and vessels available in pre-formed or sheet varieties.

Sizes available to fit IPS, CTS and SS tubing sizes. Custom OD and ID sizes optional upon request.

Pipe sizes from ¼" to 12" in preformed 4' sections. All sections have 2" overlapping SSL flaps longitudinally with a 2" jacket overlap circumferentially on one end.

Larger pipe OD's and tanks are covered in V-grooved sections of 4' length. All sections have 2" overlapping SSL flaps longitudinally with a 2" jacket overlap circumferentially on one end.

Outdoor Applications
TechLite® ASJ79 series jacketing is not intended for outdoor use except for special circumstances. Please consult factory for additional information.

Tanks and Vessels
Tanks and vessels can be covered in sheets that are cut and trimmed on site to conform to the object. Alternately, ASJ covered TechLite® foam may be applied to complicated shapes and then covered with 300 series jacket or mastic in a second step. Semi-rigid PVC molded end caps and rolled corners are available as special order from the factory.
