To whom it may concern,

In the past we have produced our Techlite® insulation pre-jacketed in Tedlar® coated Hypalon® fabric material. However, recently Tedlar® has been put on allocation by DuPont® for government and military contracts and special uses which do not include pipe insulation in general. For this reason, Techlite® has discontinued manufacturing pipe insulation jacketed in Tedlar® unless a project is approved for use by the government. Incidentally, DuPont® has also tried to discontinue their manufacturing of Hypalon® but public demand has pushed them to continue production but at a significantly higher cost.

We continue to offer our standard jackets which include ASJ (all service jacket), 300 (PVC with polyester reinforced fibers), and 800 (semi-rigid PVC).

If the allocation of Tedlar® is lifted, Techlite® will begin offering Tedlar® film as a standard jacketing option once again.

We apologize for any inconvenience that this may have caused.

Please contact us at (800) 922-5252 should you have further questions and/or concerns.

Sincerely,

Richard Henry
Mechanical Engineer
